

JEWELLERY

Complete Website Plan

Frontend Architecture, Design System & Feature Specification

August 2026

Table of Contents

- 1. Frontend Technology Stack
- 2. Visual Design
- 3–24. Website Pages (Home, Collections, Products, Cart, Checkout, Account, Journal, Paara IRL, etc.)
- 25–32. Admin Panel
- 33. Database Structure
- 34. External Services
- 35. Security
- 36–38. Responsive Design, Animation & Icon System
- 39. Component Structure
- 40–41. Customer & Admin Flow Diagrams
- 42. Recommended Extra Features

1. Frontend Technology Stack

Technology	Purpose
React.js	Complete website and reusable components
Vite	React development and production build
Tailwind CSS	Mobile-first responsive UI and styling
Framer Motion	Animations, scroll effects and page transitions
Lucide React	Search, menu, cart, wishlist, user and other icons

Device Priority

The website should be designed mobile-first:

- Mobile — Primary
- Desktop — Secondary
- Tablet — Supported

The UI should not simply shrink the desktop design. The mobile layout should be designed separately where necessary.

2. Visual Design

The Paara Jewellery architecture image provided is the functional reference.

Main Visual Direction

- Beach waves
- Seashells
- Pearl / cream backgrounds
- Warm brown jewellery tones
- Luxury / minimal appearance
- Large jewellery photography
- Soft natural textures
- Smooth wave sections
- Subtle animations

Design Principle

It should feel like a real premium jewellery brand, not an AI-generated template.

Avoid excessive:

- Glassmorphism
- Neon effects
- Excessive gradients

- Huge animations
- Random floating cards

Use whitespace, photography, typography and subtle motion instead.

3. Website Pages

PAGE 1 — HOME

Section 1 — Header

Mobile:

Desktop:

Header should become sticky while scrolling.

Section 2 — Hero

Beach/wave background with jewellery photography. Example:

Use Framer Motion for a very subtle entrance animation.

Section 3 — Best Sellers

Display products in cards. Mobile:

Desktop can use a 4-column grid. Each card should have:

- Product image
- Product name
- Price
- Rating
- Wishlist button
- Quick add/cart button

4. Daily 9 Products

This is an important feature from the architecture. Every day the website should display 9 selected products.

The admin can select the 9 products. At midnight, the website can automatically move to the next day's collection.

Admin should also be able to:

- Select products
- Schedule products
- Preview
- Publish
- Replace products

5. Collections

Each collection gets a beautiful image/banner. Clicking a collection opens filtered products.

6. Founder Section

From the architecture, include:

- Founder photograph
- Founder name
- Founder story
- Short introduction
- Founder video

READ OUR STORY

Video can be hosted through the website/CDN or a suitable video platform.

7. Customer Love

Both videos and Instagram comments requested.

Customer Video Reviews

Horizontal mobile carousel:

CUSTOMER LOVE

[Video]
"Absolutely loved my Paara piece!"

[Video]
"Beautiful quality..."

Use Framer Motion for swipe/scroll animation.

8. Instagram Customer Content

The architecture specifies manual Instagram content. Admin can add:

- Instagram post
- Customer name
- Comment
- Image
- Reel/video
- Instagram link

AS SEEN & LOVED

@customer

"Obsessed with my Paara necklace ♡"

[IMAGE]

VIEW ON INSTAGRAM

For Instagram content, the exact integration/API method should be decided during backend implementation; don't assume unrestricted automatic comment export is available.

9. Our Story

A dedicated section/page:

OUR STORY

PAARA.

Anti-Tarnish
Affordable
Pan India Shipping
Everyday Jewellery
Made To Be Loved

Include:

- Brand story
- Mission
- Values
- Founder story
- Jewellery philosophy

10. Products Page

Route:

/products

This is the main shopping page.

Filters

Users should be able to filter by:

- Women
- Men
- Price
- Category
- Material
- Collection
- Availability
- New arrivals
- Best sellers

₹0 ————— ₹10,000

Sorting
Sort by

Newest
Price: Low → High
Price: High → Low
Popularity
Best Rated

Search

🔍 Search jewellery...

11. Product Cards

Every product card should contain:

Mobile should use 2-column cards where screen size allows.

12. Product Details Page

Route:

/product/:id

Product Information

- Product images
- Product name
- Price
- Discount
- Rating
- Review count
- Material
- Size
- Weight
- Dimensions
- Care instructions
- Availability
- Shipping information

Buttons

♡ ADD TO WISHLIST

ADD TO CART

13. Product Reviews

Make it similar in concept to large e-commerce platforms.

★★★★★ 78%
 ★★★★★☆ 15%
 ★★★☆☆ 5%

Customer Name

★★★★★

"Beautiful product and packaging."

Verified Purchase

Users can:

- Give rating
- Write review
- Add images
- Comment

Admin can moderate reviews.

14. Similar Products

At the bottom of every product page:

YOU MAY ALSO LIKE

[Product] [Product] [Product] [Product]

Also:

FROM THE SAME COLLECTION

This helps increase product discovery.

15. Wishlist

Guest Wishlist

Very important requirement. A user does NOT need to log in to wishlist.

Use: localStorage

Guest
 ↓
 Add product ♥
 ↓
 localStorage
 ↓
 Wishlist remains after refresh

16. Login + Wishlist Merging

When the user eventually logs in:

Guest Wishlist
 ↓

```

Login
↓
Check Account Wishlist
↓
Merge
↓
User Wishlist

```

Before login:

```

♥ Product A
♥ Product B

```

After login:

```

MY WISHLIST

Product A
Product B

```

Nothing should disappear.

17. Cart

Route:

```
/cart
```

Features

- Product / Image / Quantity
- Increase/decrease
- Remove
- Move to wishlist
- Coupon
- Subtotal
- Shipping
- Total

```

YOUR BAG

Product A      ₹1,299
Qty: - 1 +

Product B      ₹899
Qty: - 2 +

-----
Subtotal       ₹2,198
Shipping       ₹99
-----
TOTAL          ₹2,297

[ PROCEED TO CHECKOUT ]

```

18. Authentication

Routes:

```
/login
/signup
```

Signup — Allow:

- Name
- Email
- Phone
- Password
- OTP verification

Login

```
Email / Phone

Password

[ LOGIN ]

Forgot Password?

OR

Continue with...
```

The exact authentication provider can be decided during backend development.

19. User Account

After login:

```
MY ACCOUNT

Profile
My Orders
Wishlist
Saved Addresses
Account Settings
Logout
```

Orders

```
ORDER #PAARA1024

Gold Shell Necklace
₹1,299

Delivered

[ VIEW ORDER ]
```

20. Checkout

Route:

/checkout

Steps

Address
↓
Shipping
↓
Order Summary
↓
Payment
↓
Confirmation

Payment — PayPal

PAYMENT

Order Total: ₹2,499

[PAY WITH PAYPAL]

The actual PayPal integration should be implemented securely through the backend rather than exposing payment secrets in React.

21. Order Confirmation

After successful payment:

✓ ORDER PLACED

Thank you for shopping with Paara.

Order ID:
PAARA-10245

Estimated delivery:
5-7 business days

[TRACK ORDER]
[CONTINUE SHOPPING]

Email confirmation can also be sent.

22. Founder / Our Story Page

Route:

/our-story

Sections

- Founder
- Founder video
- Brand story
- Mission
- Values

- Jewellery philosophy
- Images
- Customer story

23. Journal / Blog

Routes:

```
/journal
/journal/:slug
```

Features

- Blog listing
- Categories
- Featured image
- Article
- SEO
- Related articles

```
THE PAARA JOURNAL
```

```
Jewellery Care
Styling
Stories
New Collections
```

24. Paara IRL

Route:

```
/paara-irl
```

Contains

- Store
- Pop-up events
- Location
- Timings
- Images
- Google Maps

```
PAARA IRL
```

```
Visit us in person.
```

```
CHENNAI
Pop-up Store
```

```
10 AM - 8 PM
```

```
[ GET DIRECTIONS ]
```

25. Admin Panel

The admin area should NOT appear in the public navigation. For example:

```
/admin
or another protected route.
```

Only authorized administrators can access it.

Admin Dashboard

ADMIN DASHBOARD

Products	128
Orders	42
Customers	823
Reviews	156
Revenue	₹XX

26. Admin Product Management

Admin can:

- Add product
- Edit product
- Delete product
- Upload images
- Add variants
- Set price
- Set stock
- Set category
- Set collection
- Mark bestseller
- Mark featured

27. Admin Daily Products

DAILY 9 PRODUCTS

Today's Products

[✓] Product 1
 [✓] Product 2
 [✓] Product 3
 ...
 [✓] Product 9

[SAVE]

Publish Date:
 14 Aug 2026

This controls the homepage's daily products.

28. Admin Collection Management

Admin can:

- Create collection
- Add products
- Upload banner
- Activate/deactivate
- Reorder products

29. Admin Review Management

Admin can:

- View reviews
- Approve
- Reject
- Delete inappropriate reviews
- Feature reviews

30. Admin Instagram Content

Admin can manually manage:

Instagram Content

+ Add Post

Image

Customer Name

Comment

Instagram URL

Video/Reel

[PUBLISH]

This follows the architecture's manual feed requirement.

31. Admin Journal

Admin can:

- Create article
- Edit
- Upload featured image
- Add category
- Add SEO information
- Publish/unpublish

32. Admin Orders

Admin can see:

ORDERS			
#1001	₹1,299	Paid	Processing
#1002	₹2,499	Paid	Shipped
#1003	₹899	Pending	Pending

Order Statuses

- Pending
- Confirmed
- Processing
- Shipped
- Delivered
- Cancelled
- Returned
- Refunded

33. Database Structure

Based on the architecture image provided, the system should support entities such as:

Users & Access

- users
- addresses
- admins

Catalog

- categories
- collections
- collection_products
- products
- product_images
- product_variants
- materials

Daily Picks

- vault_products
- daily_products

Commerce

- carts
- cart_items
- wishlists
- wishlist_items

- orders
- order_items
- payments

Content

- reviews
- testimonials
- irl_events
- journal_posts
- instagram_posts

System

- coupons
- site_settings

This matches the functional architecture provided.

34. External Services

Payment

PayPal

Email

Order/notification emails.

Maps

Google Maps for Paara IRL.

WhatsApp

Optional customer communication/support.

Instagram

Customer content/feed management.

35. Important Security

Admin should not simply be hidden using CSS.

✗ Not:

```
display: none
```

Instead:

```
/admin
↓
Authentication
↓
Admin authorization
```

↓
Admin dashboard

Even if a customer knows the URL, they should not be able to access the dashboard.

36. Responsive Design

Mobile (Primary)

- Bottom navigation where useful
- Hamburger menu
- Large touch targets
- Swipeable product cards
- Sticky cart/wishlist controls
- 2-column product grid
- Mobile filters as drawer
- Mobile checkout

Desktop

- Full navigation
- Multi-column product grids
- Sidebar filters
- Larger product galleries
- Expanded admin dashboard

37. Animation System

Use Framer Motion only where it improves UX. Examples:

- Hero → fade/slide
- Products → subtle reveal
- Wishlist → heart animation
- Cart → drawer animation
- Page changes → fade
- Collection → smooth reveal
- Mobile menu → slide

Avoid heavy animations that slow mobile devices.

38. Lucide React Icons

Use Lucide instead of manually creating icons. Examples:

- Search
- Heart
- ShoppingBag
- User

- Menu
- X
- ChevronDown
- ArrowRight
- Star
- MapPin
- Instagram
- Plus
- Minus
- Trash2

39. Component Structure

A clean React structure can be:

```
├── main.jsx
└── index.css
```

40. Complete Customer Flow

41. Admin Flow

42. Extra Features Recommended

A few additions would make the client website much stronger:

Search Autocomplete

When the user types:

neck...

show:

Necklaces
Gold Necklaces
Shell Necklaces

Recently Viewed

RECENTLY VIEWED

Order Tracking

Order Confirmed
↓

↓
Out for Delivery
↓
Delivered

Back in Stock

If a product is unavailable:

NOTIFY ME WHEN AVAILABLE

Wishlist Counter

Header:

♥ 3
🛒 2

WhatsApp Support

Floating WhatsApp support button can be added if the client wants it.

Final Technology Direction

So the final Paara Jewellery project should be:

Frontend

React.js + Vite + Tailwind CSS + Framer Motion + Lucide React

Design

Mobile-first + beach waves + shells + pearl/cream luxury aesthetic

Commerce

Products + Filters + Wishlist + Cart + Checkout + PayPal + Orders

Customer

Guest wishlist → Login → Wishlist merge + Reviews + Comments + Account

Content

Founder + Video + Customer videos + Instagram content + Journal + Our Story

Admin

Hidden protected admin + Products + Daily 9 + Collections + Orders + Reviews + Instagram + Journal + Coupons

Main priority: Mobile users first, desktop users second, while keeping the complete architecture from the reference image.
